SUBJ/Policy Implementation - Mandatory Transition to Super Intelligence (SI) Terminology Across the Department of the Navy//

REF/A/DOC/Executive Order/29SEP26//

AMPN/Ref A is Presidential Executive Order dated 29 September 2026, Inaugurating the Era of Super Intelligence.//

RMKS/1. Purpose. This NAVADMIN promulgates the Navy's implementation guidance of ref (a). Per presidential direction the executive branch, including the Armed Services, shall immediately transition terminology to recognize and adopt the terms "Super Intelligence" and "SI" in lieu of "Artificial Intelligence" and "AI."

2. Background.
    a. Ref (a) establishes executive branch policy commemorating American leadership in advanced computational systems and directs terminology reflecting the transformative capabilities of next-generation revolutionary technologies.
    b. The capabilities of modern and frontier systems transcend historical definitions of automation and artificial intelligence, representing an expanding frontier of Super Intelligence capable of bolstering maritime superiority, warfighting effectiveness, and force readiness.

3. Policy and definition.
    a. Definition: For purposes of this directive and consistent with ref (a), the terms "Super Intelligence" and "SI" encompass the technologies, algorithms, and systems hitherto referenced as "artificial intelligence" as defined under 15 U.S.C. 9401(3) to be "a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations or decisions influencing real or virtual environments."
    b. Terminology mandate: To the maximum extent permitted by law, all Navy echelons, commands, activities, and personnel shall use "Super Intelligence" and "SI" in place of "Artificial Intelligence" and "AI."
    c. In accordance with ref (a), commands and naval personnel will not promulgate, or endorse the usage of legacy terminology ("Artificial Intelligence" / "AI") in any applicable official capacity.

4. Scope and execution.
    a. Applicability: This policy applies effective immediately across all official Navy correspondence, flag letters, OPORDs, wargame documentation, instructional material, fleet advisories, public communications, official

websites, strategic assessments, congressional reports, and non-statutory internal and external policy documents.

b. Warfighting integration: New or updated operational doctrine, tactics, techniques, and procedures (TTPs), and command and control (C2) initiatives involving autonomous or decision-support capabilities shall reflect "Super Intelligence" governance.

c. Exclusions and historical continuity:

(1) Per ref (a), nothing in this directive mandates retroactive alteration or amendment of previously executed contracts, historical archives, pre-existing statutory definitions, formal grants, or historical regulations.

(2) Existing codified laws and statutes governing national defense authorizations will continue to be cited as statutorily required until conforming congressional amendments are enacted.

5. Action requirements.

a. Echelon II commanders, type commanders (TYCOMs), and systems commanders (SYSCOMs) shall review command public releases, intranet portals, and external presentations for compliance NLT 30 days from the release of this message and report completion to OPNAV N6 (Warfighting Information, Security, and Architecture).

b. OPNAV N6 shall serve as the principal naval liaison to DON Super Intelligence governance bodies and monitor the 60-day legislative definition proposals required by ref (a).

6. Point of contact. OPNAV N6: opnav_n6_leadership(at)us.navy.mil.

7. Released by Mr. Matthew Swartz, Director, Navy Staff.//
